

TB-0343

**REMOVING CICS OID INFORMATION
FROM RACF USER RECORDS**

Issue Date: August 19, 2004
Effective Date: October 4, 2004
Section/Group: ITS Security
Submitted by: Bart Grant
Approved by: Michael Allred

RACF user records with CICS segments are currently populated with a CICS OID (or OpIdent) field. Until recently this field was used for accounting. Due to changes in ITS accounting procedures during the past year this field is no longer used for accounting purposes. ITS is unaware of any other process using the OID field in the CICS Segment and would like to remove the OID values from all user records beginning October 4, 2004. Any customer who knows of any processes using this information is asked to contact ITS Security (DSECURE@utah.gov) before this date to discuss ways to preserve this information for your future use.

On Monday, October 4, 2004, ITS Security will begin removing OID fields from RACF user records with CICS segments. These fields will be removed from the user records of one or more agencies each week, beginning with DAS/ITS, until they have been removed from all user records in the database.
